ASSESSMENTS SUMMARY

At this point in your life and academic career, you may know exactly what career you want to pursue, you may already be in your career, and you may have no idea what career path you will take after graduating.

Use the space below to reflect on the results from the Assessment. Are the results surprising? Are they in line with the career you want to pursue? What does the assessment tell you about yourself and your future career? How will you use these results in directing your academic progress? Your response should be at least one paragraph.

Summary:

I've been in my career for 15 years now and after taking this Assessment I was legitimately surprised to see that a Marketing career cluster was the top match for me. I generally have a disdain for marketing. This assessment was not in line at all with my current career and I'm not sure I agree with the assessment. This assessment will likely do nothing to impact my career. I also think this will not impact my academic progress.
