

## Study and Reading Skills Assignment

1. Determine your style of learning by reviewing the Learning Style PowerPoint.

I have a mixed learning style with a primary kinesthetic learning style. The secondary being a visual learner.

2. Answer the following questions based on what you covered in Unit 3 for the week. Each question should be answered in full sentences. Submit your answers for grading.

- A. What is your learning style?

My learning style is mixed with the primary and secondary being kinesthetic and visual, respectively.

- B. Do you think that you could benefit from incorporating the other learning styles in your current study habits?

I do include auditory into my learning with podcasts and videos, but I have to kind of repeat/think the information that I've listened to before it will stick.

- C. After reviewing all the slides and articles, what skills will you incorporate to make your study time more effective?

I will be making an explicit goal/task list for an activity to help create task definition to make it explicitly clear the goal of my time spent.

- D. Do you currently take notes in your classes? Why or why not? What changes specifically relating to note taking will you make in your classes?

I do take notes in classes, but I'm really bad at it. It's an important tool for memory recall. I will be trying the Cornell System to help improve my note taking.

- E. After reviewing the slides on taking tests, how will you approach test questions differently?

I will most certainly use the strategy of creating a priority tier system for questions based on ease and type. Prioritizing easy to answer questions over more complex questions. I've generally always gone from top to bottom when it comes to answering questions.
