# CSC 222

# I/O Exercise

**Write a program to solve the following problem:**

A user wishes to create a program that will display personal information they provide after performing some calculations. The program will consist of the following data:

- Name
- Major
- Height (in inches)
- Weight
- Courses Taken
- Courses Remaining

Using this data, the user will display the following information:

- Name
- Major
- Height (includes feet and inches)
- BMI (Formula: 703 * weight / (height * height) ) – **Round to 2 decimal places**
- Course Completion Percentage – **Round to 0 decimal places**
    - (Formula: Courses Taken / (Courses Remaining + Courses Taken) * 100)

**Sample Output**

```
Enter your name: Bob Jones
Enter your major: Computer Science
Enter your height: 78
Enter your weight: 205
Enter courses taken: 5
Enter courses remaining: 21

PERSONAL INFORMATION

Name: Bob Jones
Major: Computer Science
Height: 6'6
BMI: 23.69
Course Completion Percentage: 19%
```

**Submit a .java file with your code and comments**
